

## Pirate Jewels

1. Take out your markers and gem. For this project we are going to decorate our pirate booty jewels!

Our younger friends will simply color each side of the gem with a new color.

2. Our older groups are going to use the markers to create mini rainbow triangles on each side of the diamond. But first, use the color wheel paper to make your own color wheel rainbow!

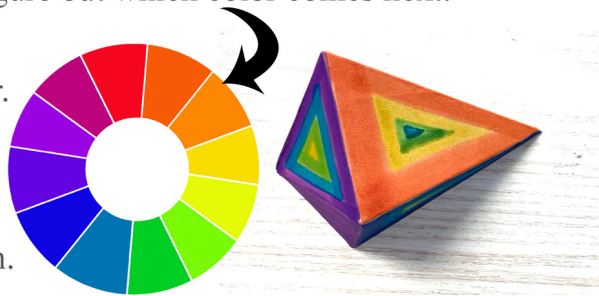

Try starting with different colors of the rainbow on each side of the gem!

Use the color wheel as a key to figure out which color comes next.

3. Repeat Step 2 with another design and color.

Continue changing colors again and make another rainbow pattern.

## Preschool Pirate Ship Project

1. Open up your box and undo the sides to flatten it out. Rebuild the box with the white part on the outside.

Once your box is inside out, begin coloring on it to turn it into a creative pirate ship.

2. Try adding patterns and shapes or your own creative drawings as you go!

3. Next, decorate the sails on both sides. Then, tape a dowel to each sail so that three inches hang below the sail.

4. Finally, poke the dowel through the top of the box.

5. Play with your pirate ship! Try making playdough people to sail on it!
