

How to Draw a Good Knight

 1. Draw an egg shape toward the top of your paper where you want the top of your knight's head to begin. You don't have to draw the bottom part of the circle yet, we want it to look like a helmet, not an egg.

2. Next, draw the helmet's face shield with a space above it for the eyes. And

add a decorative ridge on top.

3. Next, draw the shoulders downward and then turn them into arms, sectioned off into pieces of armor.

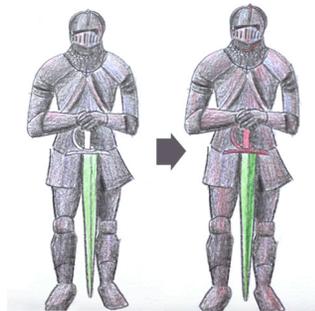

4. Draw the knight's chest, hands on the sword, hips, legs, and feet.

 5. Color in your knight with the black pencil, but use a light pressure so it looks gray.

 6. Increase your pencil pressure on areas you want to look like are in shadows if you are advanced!

 7. Add some additional colors if you want to spice things up and make the knight extra fancy!

DIY Unicorn Coloring Page

 1. Start with your black pencil. Draw the shape of the horn first. Then, the nose and ear.

2. Next, draw the shape of the face, nose, and mouth area.

3. Lightly draw the mane that sticks out from between the ears by the horn.

4. Add a circle on the end of the unicorn's nose as the nostril.

5. Then, draw the rest of the flowing mane.

6. A few last tweaks before you color it: add ridges on the horn to make it more interesting.

Then, make a design on the ears and add more contrast inside the nose and on the mouth.

 7. Finally - it's time to color!

 8. Looking for more to add? Try creating a whole garden of flowers or leaves behind your masterpiece!

 9. Finally, make a dark black outline around the edges of your drawing to make it look more like a coloring page!
